Summary

A world fit for all has been known as a terminology for defining the impact of children's right provision into the city. Having in mind that 20% of the world population today below the age of 18, through Child Friendly City, a framework has been developed to build a city which is friendlier to children. A city where the right of the children is fulfilled and the children may gain the opportunity to develop their full potential.

Actions and Implementation

The program provides access to quality kindergarten which adopts child friendly and environment friendly schools to periphery urban community, especially to underprivileged children. The impact of the program is the local community capacity elevation, placing the early childhood education teachers and principals as well as the children as the agent of change to live in a more environment friendly on the daily basis. Moreover, the program creates a child friendly environment to diminish the disparity of urban-rural linkages as well as strengthening the periphery urban community to become environmentally conscious.

Initiative Contribution

ars86care foundation and World Vision International

Innovative Initiative

Empowerment in the urban space / Integrated urban design
