| Award Scheme                  | Dubai International Award  |
| Start Year                    | 2017   |
| Sustainable Development Goals | Goal 11 - Make cities and human settlements inclusive, safe, resilient and sustainable |

## Summary

In 2015, the Global Urban Futures Project (GUF), a research initiative at the New School, developed the Habitat Commitment Index (HCI) to quantitatively measure country performance in fulfilling commitments made in the Habitat Agenda adopted at the Habitat II conference in 1996. The HCI is a composite score of 15 indicators at the country level that are essential to urban well-being.
